

# Elons The Litepaper

# What Is Elons?

Elons is an indie project that is community driven based on NFTs in the Zilliqa ecosystem. The platform rewards holders in form of limited-edition NFTs. Elons aims to plug the hole within the ecosystem for NFTs and create new exciting technology for the space.

Elons is not connected to Elon Musk and is community-based project. Elons is not limited to releasing Elon NFTs and will be used for marketing projects within the crypto space.

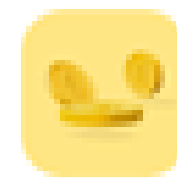

# Current Issues

NFTs have been enjoying a very big market share on the Ethereum blockchain with the Zilliqa ecosystem falling behind. NFTs can play a huge part in the future of the crypto space and can be used for a variety of different concepts.

Over the past 7 days a total of \$715,499,961 was spent on NFTs with a total of 5596722 sold, averaging at \$127.83 per item. (Source – <https://coinmarketcap.com/nft/collections/> 24/04/2021)

## NFT Collections Listed By 7 Day Sales Volume

This page lists the top NFT protocols and tokens. They are listed by 7 day sales volume with the most valuable first and then in descending order.

Total Sales Value  
**\$715,449,961.25**

Total Sales  
**5596722**

Average Price  
**\$127.83**

# Solution

Elons is planning to fill the hole on the Zilliqa ecosystem for NFTs, with the creation of a batch creator, airdropping feature, gallery, and marketplace. We believe connecting users with NFTs on the Zilliqa blockchain can help solve many problems we are already facing today.

The concepts we are exploring are:

- Marketing
- Supporting Content Creators
- Growing adoption
- Gamification
- Claimable physical goods

We believe NFTs can play a vital role in the real world and want to lead Zilliqa in the push for adoption.

# Elons Token

The Elons token is at the heart of the ecosystem, and users who holder and support the project will be rewarded with limited edition NFT content on a weekly basis.

Users who LP their tokens will also receive incentives directly from the Elons team, and we hope in the future to add ZWAP rewards to the token itself on Zilswap.io.

# Benefits of Using the Zilliqa Blockchain

Zilliqa's fees and blockchain structure are perfectly suited to the airdrop mechanisms of the Elons project.

We managed to roll out the original airdrop of 130 NFTs for only \$12 of \$ZIL and it was completed within 10 minutes. If we tried to do this on the Ethereum blockchain it would cost thousands of dollars and take upwards of 2 hours to roll out.

The Zilliqa blockchain is the best suited for our plans and we are looking forward to expanding the project on the Zilliqa ecosystem.

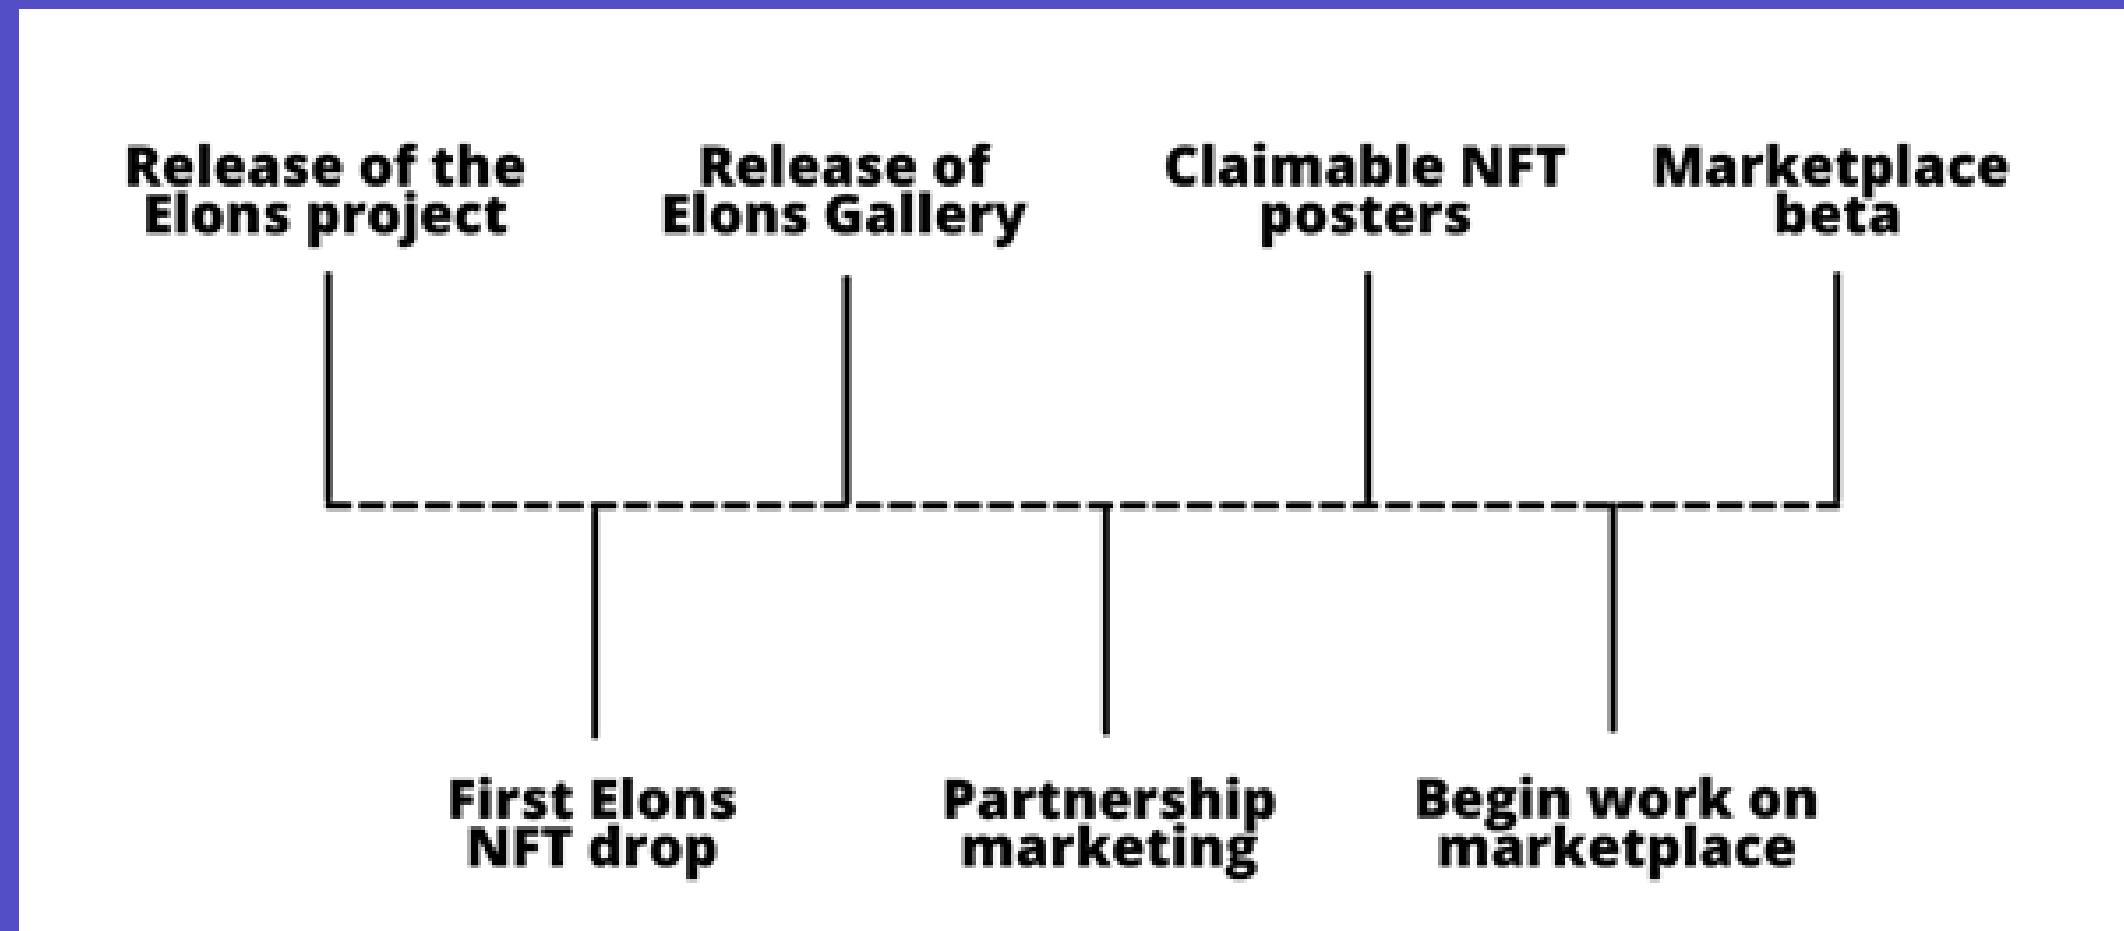

# The Team

The Elons team has vast experience in the Zilliqa and crypto space, with every member being a key figure in the Zilliqa ecosystem. The experience within the team ranges from businesses development, vast coding experience, marketing expertise, and gamification of applications.

The team behind Elons wishes to remain anonymous for the time being apart from one of the founders "Blockchain Andy", who has been a key figure in the Zilliqa community and has helped spread adoption.

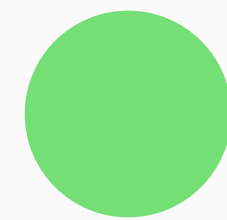

# Roadmap

Below is the working roadmap of the Elons project, this can change with time, but the community will be informed of any change within the roadmap.
